| LOCATION | 5 km N of Makuri on the Makuri-Ongaha Road; 19 km E. of Pahiatua. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| ACCESS | From farm road off Makuri-Ongaha Road. There is a gate at the NE corner, but access through it is restricted by a drainage creek. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| OUTLINE & TOPO This square block comprises a flat lowlying stream terrace and stream bank, with the Makuri-iti Stream running through the southern portion. The reserve is predominantly kahikatea with a success from seedling to mature tree on wet ground. The broad banks of the stream are grassed. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SURROUNDINGS Close to the eastern boundary are a farmhouse and buildings. A road forms the northern boundary and to the west is a gravel pit. The reserve is an isolated stand surrounded by sheep-grazed pasture on a valley floor below steep hillsides. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| GEOLOGY Calcareous siltstone. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SPM Alluvial silts and gravels; silstone. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SOIL Central yellow-brown earths; Mahoenui-Pahiatua soils. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| DRAINAGE Poor. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| CONDITION Very good condition. The understorey is regenerating rapidly after intermittent grazing which was discontinued in 1981. Possum levels are kept low. Cattle grazing has increased occurrence of ragwort and stinging nettle in open areas, although the bush itself is free from weeds. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| FENCING Well fenced on all sides, with maintenance continuing. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| PRIORITY Medium. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| SCIENTIFIC | 5 | An authentic, albeit small, relic of wet kahikatea forest with good regeneration after past grazing. High species diversity. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| SCENIC | 4 | An attractive, tall stand seen from the main road, although farm surroundings detract from its scenic value. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| RECREATION | 3 | Used for picnicking by small, local population. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| CONCLUSIONS and RECOMMENDATIONS There is a complete age range of kahikatea present here, from seedlings through to mature trees up to 2.5m diameter. The tawa canopy is common in this area; there are groves of tawa in sheltered valleys and odd scraps of tawa/broadleaved bush scattered over the steep hillsides up the Makuri-iti Valley. The low-lying reserve apparently doesn't flood but drainage is poor, so kahikatea is flourishing here (c.f. in the drained southern Wairarapa reserves). The forest floor is wet and shaded, with patches of Hydrocotyle and NZ jasmine, but otherwise bare or mossy. In the north-west corner I found Aseroe rubra (Stinkhorn fungus). Toadstools, mosses and lichens are abundant throughout the reserve. At present, the only unnatural damage is along the north and north-east fences. Although the reserve is little used, the grassy stream banks provide an ideal picnicking area. The easiest access is along the western fence-line, which requires a stile at the roadside. A track through the forest isn't necessary, as it is easy to walk through, although very muddy in places. Stock have been grazed intermittently since 1967, continued largely as a weed control measure for the weed problem created by the introduction of grazing. It is doubtful that this would achieve the desired long-term result, so grazing has now been disallowed and fences are being repaired. Attention should be paid to seasonal spraying of ragwort, and eradication of the small amount of Clematis vitalba seen near the road. A group of pines planted near the top of the south bank were cleared in 1977 as they were becoming hazardous. The banks remains open and grassed. Access to this side of the stream is difficult and requires crossing a private airstrip between the reserve and the (Continued..) | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 1½ hours Wet, overcast conditions IG 1981 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

CONCLUSIONS AND RECOMMENDATIONS (Continued)

main valley road. This is the most vigorous stand of undrained kahikatea in the vicinity, although small, and should be respected as such.

NATIVE SPECIES

Trees and shrubs

Aristotelia serrata
Beilschmiedia tawa
Brachyglottis repanda
Carpodetus serratus
Coprosma areolata
C. lucida
C. rhamnoides
C. rigida
C. rotundifolia
Cordyline australis
Coriaria arborea
Dacrydium cupressinum
Elaeocarpus dentatus
E. hookerianus

Climbers, lianes etc.

Clematis foetida
C. paniculata
Fuchsia perscandens
Metrosideros colensoi

Grasses, rushes and like plants

Carex dissita
C. virgata
C. sp.

Herbs

Acaena anserinifolia
Astelia fragrans
Cardamine sp.

Ferns

Anarthropteris lanceolata
Asplenium bulbiferum
A. flaccidum
A. polyodium
Blechnum chambersii
B. fluviatile
B. capense

celery-leaved buttercup
Clematis vitalba
creeping buttercup
gum
hawthorn

Fuchsia excorticata
Griselinia littoralis
Hebe stricta
Hedycarya arborea
Hoheria populnea var. lanceolata
Leptospermum scoparium
Lophomyrtus bullata
L. obcordatum
L. bullata X obcordatum
Melicope simplex
Melicytus micranthus
M. ramiflora
Nestegis cunninghamii

Paratrophis microphylla
Pennantia corymbosa
Pittosporum eugenoides
Podocarpus dacrydioides
P. ferrugineus
P. totara
Pseudopanax anomalous
P. arboreus
P. crassifolius
Pseudowintera axillaris
P. colorata
Schefflera digitata
Urtica ferox

Metrosideros diffusa
M. perforata
Muehlenbeckia australis
Parsonsia heterophylla

Passiflora tetrandra
Ripogonum scandens
Rubus australis
R. cissoides

Cortaderia toetoe
Juncus sp.
Luzula picta

Microlaena sp.
Poa anceps
Uncinia uncinata

Colospermum microspermum
Earina autumnalis
E. mucronata

Hydrocotyle americana
H. moschata
Senecio minimus

Dicksonia fibrosa
D. squarrosa
Histiopteris incisa
Hymenophyllum sanguinolentum
Pellaea rotundifolia
Phymatosorus diversifolius

Pneumatopteris pennigera
Polystichum richardii
P. vestitum
Pteridium esculentum
Pyrrosia serpens

EXOTIC SPECIES

Jerusalem cherry
macrocarpa
nightshade
plantain
poplars

ragwort
Solanum nodiflorum
thistle
willow
