

## C.C. Ogle List

Native Trees and Plants in Gully behind Papakowhai House.  
July, 1973.

- |                                     |                                      |
|-------------------------------------|--------------------------------------|
| Adiantum cunninghamii               | Polystichum richardii                |
| Alectryon excelsum (titoki)         | Pseudopanax crassifolium (lancewood) |
| Asplenium bulbiferum                | Pteris tremula                       |
| - colensoi                          | Pyrrosia serpens                     |
| - flabellifolium                    | Tetrapathaea tetrandra               |
| - flaccidum                         |                                      |
| - hookerianum                       |                                      |
| Beilschmiedia tawa (tawa)           |                                      |
| Blachnum capense                    |                                      |
| - filiforme                         |                                      |
| - lanceolatum                       |                                      |
| Coprosma propinqua                  |                                      |
| - rhamnoides                        |                                      |
| Cyathea dealbata (pōnga)            |                                      |
| - medullaris (mamaku)               |                                      |
| - smithii                           |                                      |
| Cyclosorus penniger                 |                                      |
| Dacrydium cupressinum (rimu)        |                                      |
| Dichondra repens                    |                                      |
| Dysoxylum spectabile (kohekohe)     |                                      |
| Elaeocarpus dentatus (hinau)        |                                      |
| Hedycarya arborea (pigeonwood)      |                                      |
| Hypolepis rugosula                  |                                      |
| Knightia excelsa (rewarewa)         |                                      |
| Lastreopsis glabella                |                                      |
| - velutina                          |                                      |
| Leptospermum ericoides (kanuka)     |                                      |
| - scoparium (manuka)                |                                      |
| Macropiper excelsum (kawakawa)      |                                      |
| Melicope ternata                    |                                      |
| Melicytus ramiflorus (mahoe)        |                                      |
| Metrosideros diffusa (rata)         |                                      |
| - fulvida (rata)                    |                                      |
| - perforata (rata)                  |                                      |
| Microsorium scandens                |                                      |
| Muehlenbeckia australis             |                                      |
| Myoporum laetum (ngaio)             |                                      |
| Myrsine australis (mapou)           |                                      |
| Parsonsia heterophylla              |                                      |
| Pellaea rotundifolia                |                                      |
| Podocarpus dacrydioides (kahikatea) |                                      |
| - ferrugineus (miro)                |                                      |
| - spicatus (matai)                  |                                      |
| - totara (totara)                   |                                      |
