a = abundant, c = common, u = uncommon (or actual no. of individuals), l = local (may be common in small areas), x = recorded, no information about abundance.

1) At least 2 families of tuis with fledged juveniles.

2) Only one mistletoe seen in totara, likely more individuals present, but uncommon.

Sites:

- 1 swamp maire forest, with kahikatea and pukatea (E)
- 2 kahikatea/totara forest on carex wetland and rush/Sphagnum swamp (FG)
- 3 totara forest in sheep paddock (J)
- 4 small patch of swamp maire/pukatea with *Lophomyrtus obcordatum* (K)
- 5 mixed broadleaf regenerating forest, water works (D)
- 6 titoki forest in paddock (AB)
- 7 northern rata/totara forest on river terrace edge (C)
