Notes

The following is nationally local, following Cameron et al. (1995):

Brachyglottis turneri: endemic to North Taranaki; previously known sites include Mimi, Tangarakau and Mangaio Rivers.

In addition, the following native species are notable occurrences:

Litsea calicaris - near southern limit (Mt Messenger) - common in forests from Waikato and Rotorua northwards.

Dracophyllum latifolium - near southern limit

The following adventive plants have very local occurrences in Wanganui Conservancy (and NZ);

Vallisneria sp. (eelgrass): V. gigantea (perhaps V. spiralis) has few NZ records, but they include L. Wiritoa and a wetland near Waverley; and L. Pupuke (Auckland), Palmerston North and an early Christchurch record.

Ottelia ovalifolia (swamp lily): scattered from Northland to Nelson, mostly in ornamental ponds, but known in top Moumähaki Lake inland from Waverley.
