

ADDITIONS TO THE LIST OF THE VASCULAR PLANTS  
OF THE CASTLEPOINT AREA

G. N. Park

The following species have been added by Mr. A.P. Druce and the author since the list first appeared in "Castlepoint Survey, First Report" (July, 1965) as an appendix to an account of the vegetation. All species are from Castle Rock.

*Acaena novae-zelandiae*  
*Agropyron scabrum* ("green leaf" var.)  
*A. scabrum* ("glaucous" var.)  
*A. kirkii*  
*Asplenium anomodum*  
*Carex flagellifera*  
\**C. geminata*  
*C. pumila*  
\**Cortaderria toe-toe*  
*Deyeuxia filiformis* var. *littoralis*  
*Dichondra brevifolia*  
*Epilobium nummularifolium*  
*Festuca multinodus*  
*Geranium microphyllum*  
*Muehlenbeckia complexa*  
*Myosotis pygmaea* var. *pygmaea*  
*Notodanthonia buechananii*  
*N. clavata*  
*N. penicillata*  
x*Matthiola incana*  
*Parietaria debilis*  
*Parapholis incurva*  
+*Poa anceps* var. *condensata* x *P. caespitosa*  
*Senecio elegans*  
*Trisetum* sp.  
o*Daucus glochidiatus*

- \* = recorded but not identified  
+ = *Poa anceps* var. *anceps* (of list)  
x = "Trisitionic sp." (of list)  
o = coll. Margaret Gordon

A NOTE ON OTHER ORCHIDS AT MT. PERCY

For the purpose of brevity, the orchids are merely listed according to the mapped vegetation types.

- Kanuka forest (a) ridges and upper valley sides (more stable soils)  
Acianthus fornicatus sinclairii  
 A. reniformis oblonga (rare)  
Caladenia carnea minor  
Chiloglottis cornuta  
Corybas trilobus (abundant)  
Prasophyllum nudum  
Pterostylis graminea  
 P. trullifolia var. alobula

Most of these species occupy the uppermost portions of ridges and suggest affinities with a black beech sere.

- (b) valley sides and valley floor  
Chiloglottis cornuta  
Corybas macranthus  
 C. trilobus  
Pterostylis patens

- Tauwhinu/senecio scrub (fertile soils)  
Chiloglottis cornuta  
Corybas macranthus  
 C. trilobus  
Microtis unifolia  
Pterostylis montana  
 P. patens (east of Mt. Percy trig)

Pigeonwood/mahoe forest - Earina mucronata

Karaka forest - Earina mucronata
